Plat of Township 12 South Range 30 west of 6th P.M.

In the matter of Survey of township twelve (12) South Range twenty (30) west of 6th P.M.,

I have to report as follows & wit many of the Original Corns in the south part of said township had entirely disappeared from decay or other causes they were replaced at proper distances in all cases in relation to such as were found the accompanying plat of said survey is drawn to a scale of 2½ inches to 80 chs or one mile and the course and distance of each section line is marked thereon Said survey was begun on the first day of October and Completed on the 12th day of November AD 1882 the length of each section line being marked on the plat the ¼ corns along all interior lines have been put on a straight line and Equi distant from the section Corners as near as may be as careful work could determine on the north and west tiers of sections the ¼ corns are placed as indicated in field notes of Original survey all which is most respectfully submitted this 19th day of November A.D. 1888

Martin Allen
County Surveyor
Ellis Co. Kansas
